Value Proposition

- Painless integration of imagery with local data published on the web by a variety of sources
- Instant 24/7 access to a comprehensive image library on an affordable subscription or transaction basis
- Scalable – currently 16 terabytes of fully redundant data storage
- Provides valuable backdrop to map data
- Data Content Layers – Aerial Imagery, DOQQ's, Satellite Imagery, DRG's, Proprietary/Commercial Imagery and Data Content
- No integration issues – imagery is mosaicked and added to data set in datum/projection of user's session
- Recoup your cost – resell your imagery and data content as a Value Added Reseller (VAR) through Pixxures Online Image Store or via our Web Service Subscriptions
- Reduce the traffic of public phone and email inquiries, let us take care of your ECommerce
